

THE POWER OF MEMORY

In interactions both social and biological is memory size advantageous?

$$\begin{matrix} & C & D \\ C & (3, 3) & (5, 0) \\ D & (0, 5) & (1, 1) \end{matrix}$$

	1	2	3	...	<div>memory-1</div> <div>$n-1$</div>	<div>n</div>
player p	C	C	C	...	D	...
player q	C	C	D	...	D	...
